CHAPTER 1

LEGAL, FINANCIAL, COMPLIANCE AND RELATED INFORMATION

110 MINIMUM REQUIREMENTS FOR LEGAL, FINANCIAL, COMPLIANCE AND RELATED INFORMATION

111 Introduction

The permit submitted by White Oak Mining & Construction Co., Inc. has been transferred to Lodestar Energy, Inc. includes a "Permit Application Package" (PAP) and a "Mining and Reclamation Plan" (MRP). Both the PAP and MRP were submitted in revised form in November 1994. It is the intent that the PAP will remain as a "Historical" document wherein lies all information and appendices required for the granting of the original permit. The MRP is intended to be a living document wherein the operational and reclamation requirements are addressed. From time to time is expected that information and studies will need to be added to the complete permit package. If historical in nature, meaning that it is unlikely that the information will change over time, it will be submitted as an appendix to either the PAP or MRP as appropriate.

The plans that follow have been separated into two sections, the Operation Plan and the Reclamation Plan. The Operation Plan is intended to be a summary of the environmental commitments which have been made between Lodestar Energy, Inc. and the Utah Division of Oil, Gas & Mining (UDOGM). The Reclamation Plan includes all aspects of reclamation which are desired and/or required to protect the environment.

The White Oak Permit Area consists of about six and one-half square miles of land situated on the northern end of the Wasatch Plateau of Utah astride the Carbon-Emery county line. The property straddles the divide between the headwaters of Huntington Creek on the west and Long Canyon (east) and the Elbow on the east (see Map 100). Surface and Coal Ownership for the Permit Area are shown on Maps 112.500 and 112.600 respectively.

The Mine Complex has several names Belina Mine Complex and White Oak Complex. There are two underground mines at this site that have had different names. The original names were Belina No. 1 and No. 2 mines. The names were changed to White Oak No. 1 and No. 2 after acquisition by White Oak Mining & Construction and unchanged after Lodestar's acquisition. The surface mining at this complex to recover the barrier coal is called Whisky Creek No. 1 Mine. These facilities are referring to the same area. The Loadout has two names the Valcam Loadout and the White Oak Loadout. These names refer to the same area.

MAP 100. PERMIT AREA BASE MAP MAP 112.500. SURFACE OWNERSHIP MAP 112.600. COAL OWNERSHIP

Elevation varies from a low of about 7,800 feet at the White Oak Loadout and General Office areas in the south end of Pleasant Valley (running north and south) approximately three miles south of the town of Scofield, Utah. The White Oak Complex is within Whisky Canyon and backdropped

by the ridges cresting at nearly 9,800 feet, with the southern portion of the area upwards to 10,200 feet.

To get from the Loadout Facility to the White Oak Complex, you travel south to Eccles Canyon, then westerly up Eccles Canyon to the White Oak Haul Road turnoff between Whisky Canyon and South Fork Canyon, you then travel south westerly up the White Oak Haul Road on the east facing side of Whisky Canyon to the White Oak Complex.

The MRP area involves four distinct areas, 1) the Loadout Facility, 2) the General Office area, 3) the White Oak Haul Road, and 4) the White Oak Complex.

The White Oak properties and adjacent areas are vegetated having canyons with steep slopes and rounded summits, within the aspen-spruce-fir phase of the boreal forest biome, with representatives of cool desert shrub, riparian, and, to a lesser extent, mountain brush community types present as significant though minor components.

The spruce-fir community, a type found mainly on north-facing slopes is dominated by Engelmann spruce and subalpine fir, with variants supporting admixtures of aspen and wet meadow subtypes characterized by species of sedges and grasses. Often broad transitional zones occur between the dense spruce-fir forest and adjacent aspen communities. Occasionally stands of the spruce-fir type are almost entirely single species and dominates due to past logging or other successional influence.

White Oak believes wildlife has not been adversely effected by the mining activities as many of the species are witnessed in and around the Permit Area on a regular basis throughout the more favorable seasons.

The historic land use of the Loadout Facility and General Office Area has been mining since around the turn of the century and to the east, rangeland, while the area of White Oak Complex was rangeland with the exception of the O'Connor Mine near the head of Boardinghouse Canyon and the Old Black Diamond Mine in upper Finn Canyon. Both of these mines are just east of the O'Connor Fault and approximately one mile west of the town of Clear Creek, Utah.

The dominant soils in the area are loamy and are moderately deep (20 to 40 inches) with thin, dark surface horizons (high in organic matter), medium-textured (loamy) surface layers, and moderately fine-textured (clay loam) subsoils. Coarse fragment contents tend to be high (35 to 50 percent). A small portion of the area also consists of gravelly and stony colluvial slopes, rock outcrops, and very shallow soils.

The White Oak properties are within the Wasatch Plateau coal field on the west flank of the Clear Creek Anticline (Doelling, 1972) and is partially within the Clear Creek gas field. The dip of the strata is generally towards the southwest, ranging from four to eight percent (two to five degrees).

With the exception of local alluvial deposits, all of the units exposed on and immediately adjacent to the properties are Cretaceous members of the Mesa Verde Group. The Star Point Sandstone, which is exposed at the surface in the east canyons, is approximately 1,000 feet thick and nearly devoid of shale (Doelling, 1972). This yellow-grey (salt and pepper) beach sandstone is massive

and medium-grained (Speiker, 1931). Speiker (1931) had identified three types of shale in the Blackhawk Formation, all continental in origin.

Most of the faults have a northerly trend. The Connelville Fault forms the western boundary of the White Oak Permit Area with a drop which varies from 190 feet at the western central permit boundary to 75 feet near Eccles Canyon (U.S. Geological Survey 1979). Another major fault in the area, the O'Connor Fault, extends through the center of the White Oak Permit Area and has a drop of about 350 feet (U.S. Geological Survey 1979). The Pleasant Valley Fault generally runs parallel to Mud Creek and lies toward the western boundary of the Loadout Facility.

The Permit Area is situated in the headwaters of the Price and San Rafael River basins, with the Carbon-Emery county line marking the watershed divide.

The Loadout Facility/General Office Area portion of the Permit Area crosses over a total of four small watersheds. Green Canyon is an east facing drainage and the remaining three (Broads Canyon and two unnamed watersheds) are west facing drainages. The White Oak Complex portion of the Permit Area crosses over a total of seven small watersheds. Four of the seven are east facing drainages with the remaining three being west facing drainages. The east facing drainages include Eccles Canyon, Boardinghouse Canyon, Finn Canyon, and Long Canyon (south). West facing drainages include Burnout Canyon, James Canyon and Coal Canyon. Local perennial streams which may potentially be impacted by mining include Upper Huntington Creek, Eccles Creek and Mud Creek.

Approximately three quarters of the surface water runoff drains from the total Permit Area to the east through Eccles Creek and other smaller tributaries of Pleasant Valley and Mud Creek. The remaining area not tributary to Scofield Reservoir drains to the south and west towards the San Rafael River via Upper Huntington Creek and Electric Lake.

Snowmelt is the primary source of water for the perennial streams in the two major drainage basins with summer precipitation usually producing little runoff (U.S. Geological Survey, (1979). The information contained in this section is intended to fulfill the requirements of R645-301-100 and to ensure that all relevant information on the ownership and control of the mining activities is supplied to the regulatory agency(s).

112 Identification of Interests

112.100 Business Entity

Lodestar Energy, Inc. is incorporated under the laws of the State of Delaware and is in good standing and has legal corporate existence.

112.200 Permit Applicant and Mine Operator

The permit applicant and mine operator is:

Lodestar Energy, Inc.
HC 35, P.O. Box 370
Helper, Utah 84526
Telephone: (435) 637-9200
Employer I.D. No. 87-0569216

INCORPORATED

OCT 26 2001

Applicant's Resident Agent:

The resident agent who will accept service of process is:

David B. Miller
Lodestar Energy, Inc.
HC 35, P.O. Box 370
Helper, Utah 84526
(435) 448-9455

The abandoned mine land reclamation fee will be paid by:

Marilyn Adamson
Lodestar Energy, Inc.
333 West Vine Street
Suite 1700
Lexington, KY 40507

Ira Leon Rennert (212) 541-6000	Director	30 Rockefeller Plaza, Suite 4225 New York, NY 10112

112.400 Coal Mining and Reclamation Operation Owned or Controlled

Lodestar Holding, Inc., 30 Rockefeller Plaza, Suite 4225, New York, NY 10112 (212) 541-6000, owns 100% of the Lodestar Energy, Inc. stock. Refer to Appendix 1-1 for a listing of mining operations owned or controlled by officers or director of Lodestar Energy, Inc.

112.500 Legal or Equitable Owner of the Surface and Mineral Properties

The legal and equitable owners of the surface and mineral properties to be affected by this mining operation during the duration of the permit period are shown on Tables 112.500 and 112.600. Surface and coal ownership are shown on Maps 112.500 and 112.600.

The town of Clear Creek and associated lands and coal rights were retained by White Oak Mining and Construction as shown on the Surface Ownership Map 112.500 and Coal Ownership Map 112.600. White Oak Mining and Construction may have intentions for selling these retained lands and rights.

112.600 Owners of Record of Property Contiguous to Proposed Permit Area

Owners of Surface Properties are shown on Table 112.500 and Map 112.500.

112.700 MSHA Numbers

The MSHA numbers issued for the White Oak Mines and Loadout by the Department of Labor to White Oak Mining and Construction have been transferred to Lodestar Energy, Inc. as follows:

- White Oak No. 1 Mine MSHA Number 42-01279 (2/12/1976)
- White Oak No. 2 Mine MSHA Number 42-01280 (2/12/1976)
- White Oak Loadout MSHA Number 42-01280 (11/13/1986)
- Whisky Creek No. 1 Mine MSHA Number 42-02315 (4/15/2001)

112.800 Interest in Continuous Lands

Lodestar currently has no interest, options or pending bids on contiguous lands not transferred by White Oak Mining and Construction to Lodestar (i.e., White Oak Mines and Horizon Mine). The town of Clear Creek and associated lands and coal rights were retained by White Oak Mining and Construction.

INCORPORATED

112.900 Certification of Submitted Information

Information submitted to the Division is certified as required by the UDOGM regulations.

113 Violation information

Neither the permittee/operator, nor any of its subsidiaries, affiliates, members or managers or persons controlled by or under common control with the applicant has had a federal or state mining permit suspended or revoked in the last five years; nor forfeited a mining bond or similar security deposited in lieu of bond.

Violation notices in connection with permit ACT/007/001 are listed in Appendix 1-1.

The mining operations associated with Lodestar Energy, Inc. receiving violation notices in connection with underground or surface mining activities within the last three years are listed in Appendix 1-1.

114 Right of Entry information

White Oak Mining and Construction agreed to assign to Lodestar Energy, Inc., all right, title and interest in the White Oak Mines and Loadout as listed in this permit, subject to Division approval of the transfer of Mine Permit No. ACT/007/001. Federal Coal Leases being transferred are listed on a letter dated October 12, 1999, from the Bureau of Land Management.

Lodestar Energy, Inc bases its right to enter and undertake coal mining on the coal leases listed below. Several of the coal leases are shared with Canyon Fuels Company's Skyline Mine (*italics*). The boundary for mining of the leases between the mines is dictated by faulting and permit boundary. Some areas of the leases within the permit boundary are not available for mining due to faulting or lack of minable coal resource. Since the areas are governed by the BLM and Carbon County the exact acreages available for coal recovery and by which mine, are recorded in their offices.

As a reference, approximately 740 acres of lease U-020305/U-70018, approximately 80 acres of lease U-044076 and approximately 120 acres of the Carbon County lease are within the White Oak Permit Boundary.

Lease No.	Acreage	Issued to	Date of Issuance
<i>U-020305 (U-70018-segregated)</i>	1,439.4	<i>Emmett K. Olson</i>	3/10/62
U-017354	1,028.5 159.6	Independent Coal and Coke Company White Oak Mining and Construction	9/1/65 10/3/97
<i>U-044076</i>	2,367.8	<i>Armeda N. McKinnon</i>	9/1/65
U-067498	501	Independent Coal and Coke Company	1/1/62
<i>Carbon County</i>	361.2	<i>North American Coal Corporation</i>	5/1/69

A table in Appendix 1-2 give the legal description associated with the coal leases listed above.

INCORPORATED

Appendix 1-2 contains a general summary of the chains of title associated with White Oak surface and coal leases.

The permit area will be increased by 159.6 acres with the addition of the 1999 Lease Modification.

In 1997 the Bureau of Land Management (BLM) and the Forest Service evaluated an application to modify federal coal lease U-017354. The lease modification area (1999 Lease Extension area) encompasses federal coal lands contained within the Manti-La Sal National Forest. The two agencies jointly conducted an environmental analysis according to 43 CFR 3400 and the National Environmental Policy Act of 1969 (NEPA). A copy of the environmental analysis is contained in the project file at the Forest Service Office. The agencies granted a categorical exclusion for the lease modification, therefore an environmental assessment nor a environmental impact statement were required to be prepared by the applicant, making the modification exempt from further analysis under a category 1909.15, 31.1b, (7) per the Forest Service Handbook. The OSM participated in this action as a cooperating agency for permitting under SMCRA and 30 CFR 700.

The lease was modified to allow the mining of federal coal reserves that would otherwise be bypassed. No disturbance to the surface is planned or required to the 1999 Lease Extension area. Refer to Section 10 for additional detail for the 1999 Lease Extension.

The following is a description of the permit boundary for the White Oak Mines and Loadout.

Township 13 South, Range 6 East, SLM

Section 24: SE1/4 and portions of S1/2 NE1/4, NW1/4 NE1/4, and E1/2 SW1/4

DIV OF OIL GAS & MINING

Disturbed Acreage:

Loadout Facility	33.2
General Office Area	2.6
Lower Haul Road	22.7
Upper Haul Road	23.4
Mine Complex	69.2

TOTAL ACRES 151.1

INCORPORATED

MAR 21 2002

BIVACON COAL & MINING

The White Oak Complex is adding 8.28 acres to the disturbed area boundary making the total 69.2 acres. The area within this boundary is made up of 29.5 acres disturbed by the underground surface facilities and an additional 17.3 acres will be disturbed by the surface mining activity. The total disturbance area of the surface mine will be 29.4 acres. The total area of disturbance within the Mine Complex disturbed area boundary is 46.8 acres.

The surface mining plan shows part of the area to be mined in months 12 and 14 that falls on to open Federal coal. Lodestar commits that if an agreement with BLM is not reached by the time the mining reaches this area, the coal will not be mined in the parts of months 12 and 14 that fall on open Federal coal. Lodestar commits to survey this property and identify this boundary with stakes.

115 Status of Unsuitability Claims

The permit area is not within an area or under study as an area designated as unsuitable for mining under R645-103-400, nor has any petitions been filed with the UDOGM under R645-103-420 that could affect the proposed permit area. No surface operations or facilities are located within 300 feet of an occupied dwelling or within 100 feet of a cemetery. Reclamation at the Loadout Facility paralleling State Road 96 and where the Haul Road is adjacent to, and intersects State Road 264, are within 100 feet of a public road right-of-way.

116 Permit Term

The White Oak Mines and Loadout are proposed for a 5 year term under the Permanent Regulatory Program for 5 years. The current 5 year term is August 1999 through August 2004.

117 Insurance, Proof of Publication, and Facilities and Structures Used in Common

A copy of the Certificate of Insurance issued to Lodestar Energy, Inc, by Lexington Insurance Company, effective through August 2002, is on file with the Division. The insurance company has listed Lodestar Energy, Inc and subsidiaries, as the named insured party under Commercial General policy number 1320442, which is currently in effect at White Oak Mines and Loadout. Subsequent insurance renewal documents will be submitted to the Division and included in Appendix 1-3.

Notice of the permit transfer application was published in the Sun Advocate, Price, Utah on May 27, 1999. Proof of publication was submitted to the Division pursuant to R645-303-322 and a copy is included in Appendix 1-3.

The railroad tracts overlap the permit areas of the White Oak and Skyline Mines.

The surveyed disturbed area boundary was found to contains 142.8 acres and the permit boundary contains 3,906 acres more or less. Maps R645-301-231.300 (sheets 1 - 4), 645-301-527 (sheet 4) and Plate 2-1 (Section 10) show the permit and disturbed area boundary.

118 Filing Fee

A copy of this permit application is on file with the Utah Division of Oil, Gas and Mining (UDOGM), P.O. Box 145801, Salt Lake City, Utah 84114-5801.

120 PERMIT APPLICATION FORMAT AND CONTENTS

This permit application will comply with R645-301-120.

130 REPORTING OF TECHNICAL DATA

All technical data submitted in the permit application will be accompanied by the name or organization responsible for the collection and analysis of data, dates of collection and descriptions of methodology used. Technical analyzes will be planned by or under the direction of a qualified professional in the subject to be analyzed.

In addition to White Oak personnel, the following assisted or were consulted in the preparation of the application for the MRP:

1. United States Department of the Interior
Office of Surface Mining, Reclamation and Enforcement
Western Field Operations
Denver, Colorado
2. State of Utah, Department of Natural Resources
Division of Oil, Gas, and Mining

RE: Revised 1994 Addendum to PAP Section 100, Mining Permit No. ACT/007/001.

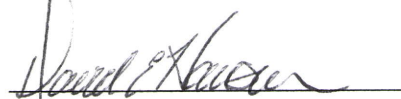

Dear Mr. Baker:

As requested by Steve Tanner of White Oak Mining & Construction Company we are enclosing a revised copy of the White Oak PAP Addendum 1994-1, Section 100. As you have instructed, three copies of this addendum have been forwarded to the Division. The revisions incorporated into this submittal include:

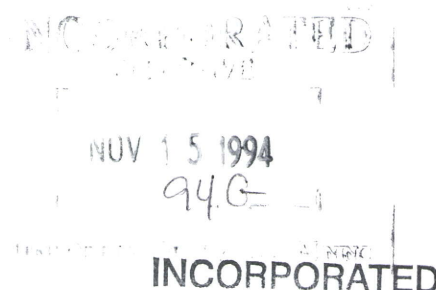

- A plastic sheet protector has been inserted before Page 100-1 of 44. The "Verification of Responsible Individual" sheet should be removed from the previous submittal of this document, folded, and inserted into the sheet protector.
- Page 100-15 of 44 - The permit number for Kiah Creek Mining has been corrected
- Page 100-22 of 44 - Rescu-Med has been added to the Surface Ownership Table 112.500.
- Page 100-24 of 44 - Stagstead Corp property is apparently now owned by Robert K. Peper. Some property previously owned by Kaiser Steel Corporation (Now Kaiser Steel Resources) has also been Quit Claimed to him. Updated addresses for both Kaiser Steel Resources and Robert K. Peper have been provided on Coal Ownership Table 112.600. Changes have also been made as appropriate to Coal Ownership Map R645-301-112.600.
- Page 100-42 of 44 - The disturbed acreage for the General Office Area has been added to Section 116.100.
- Page 100-42 of 44 - The location of certificates are referenced to the "Findings for Transfer of Permit", submitted to the Division on May 26, 1994.

These revisions should result in an accurate and current Addendum to Section 100 of the PAP. If there are any questions or if we may be of further assistance, please contact us.

Sincerely,

David E. Hansen, Ph.D., P.E.
Principal

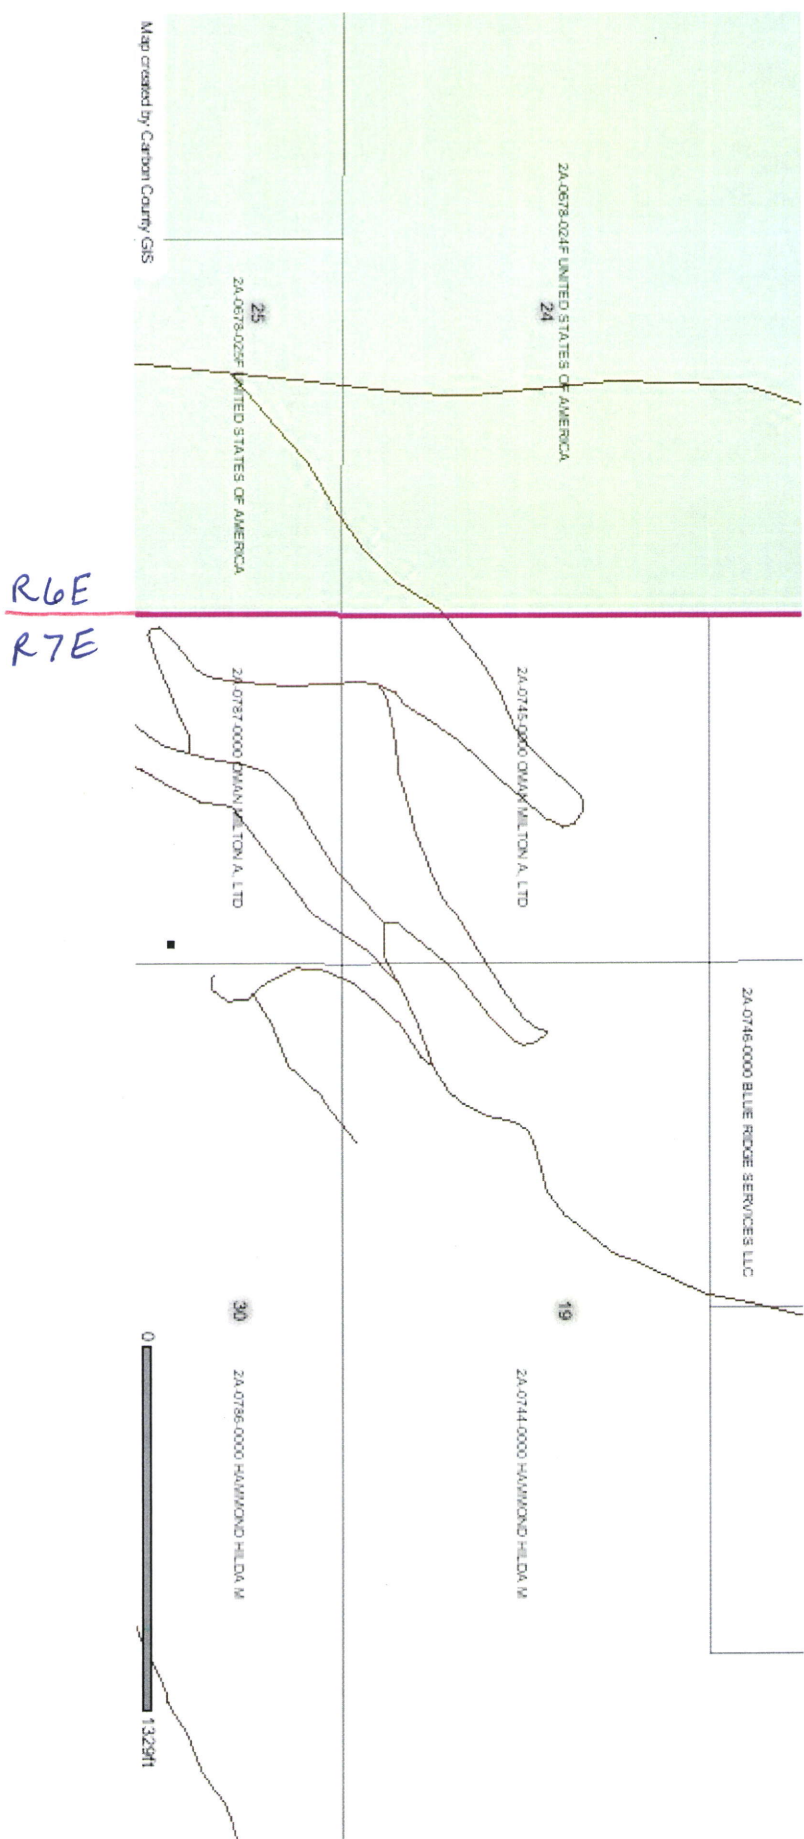

cc: Steven K. Tanner - White Oak
